## The Vision for the 2009-2010 School Year

We look to the future and plan for OLPH 2009-2010. We are creating a program which will provide our students with a comprehensive Catholic education. These are key elements which are the standards by which we will measure student success and the success of the school:

1. The formation and spiritual development of its students as knowledgeable and practicing Catholics
2. Students understand their roles in the community and their leadership potential, striving to be the best they can be
3. Positive growth and development in all areas of personal responsibility and respect for others, property and authority
4. Academic achievement in all areas, particularly in literacy and communication skills
5. Outstanding programs in mathematics and science
6. Integration of technology in academic studies and as a useful tool for life
7. Understanding good sportsmanship and competing successfully in all academic areas
8. Opportunities to become meaningful stewards of the earth and its resources through Environmental Education
